■ **CCSI FTP sites: How do I get to the Cad Cam Systems FTP sites?**

■ Cad Cam Systems has 2 ftp sites for customer use. There is a support site where you can upload large problem files for us to work on with customers. There is also an update site for customers to download the latest versions of Delcam software if they are having a problem accessing the Delcam Maintenance site. They can both be accessed most easily with a free software program called FTP Commander. Download this file [freeftpcommander.zip](#) the follow these instructions "[Access Cad Cam Systems FTP site](#)". If you are unable to use FTP commander, e-mail [support@cadcamsystemsinc.com](mailto:support@cadcamsystemsinc.com) for alternative instructions.

CLC

#2) Unzip the file and double click on “freeftpcommander.exe” to install the program.

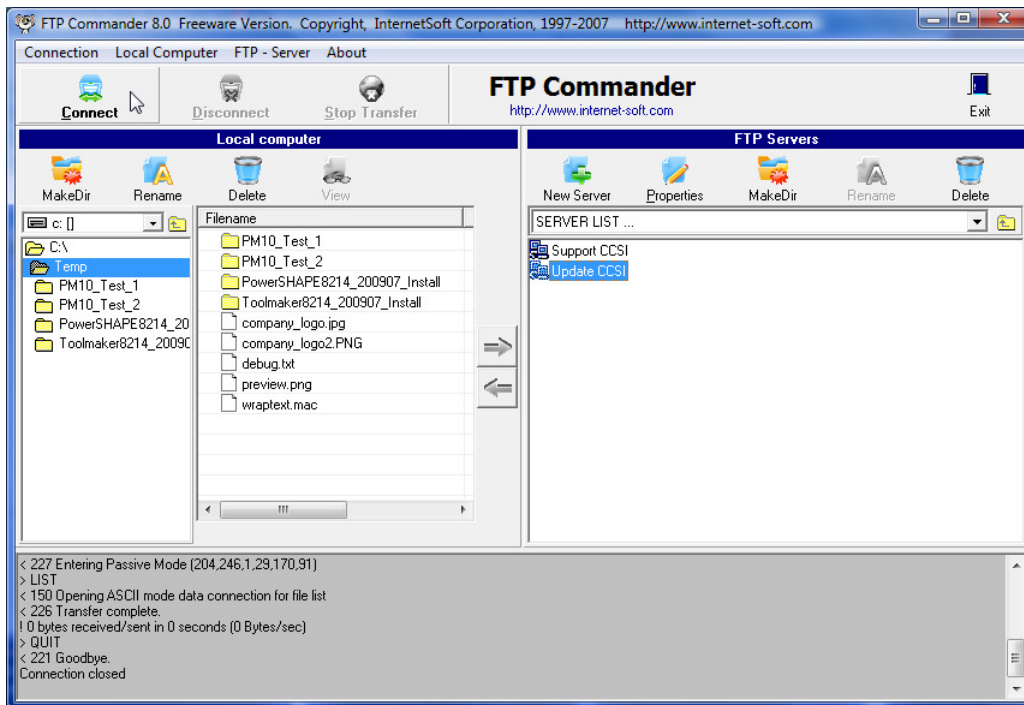

#3) Contact us at [support@cadcamsystemsinc.com](mailto:support@cadcamsystemsinc.com) and ask for FTP access. We will send you a file in your E-mail. The file will be called ‘Ftplist.txt’. Copy that file to the desktop.

#4) Browse on your computer to the location ‘C:\Program Files\FTP Commander’ and move the file from the desktop (Ftplist.txt) to that folder. Overwrite the one that is there.

#5) Run the program FTP Commander from the Start Menu.

#6) Select the site you want to open and press Connect.

#7) Select the file you want to download and press the arrow button to copy it to your computer.
